Greetings from Cornell University's College of Agriculture and Life Sciences (CALs)!

The CALS Office of Admissions revised the articulation agreement between CALS and our current partners. The following revisions have been made:

1. The Applied Economics and Management (AEM) major will no longer be accepting transfer applications for spring semesters.
2. Cornell University now accepts both the Common Application and the Universal Application. Links to the application materials are provided on the enclosed agreement.
3. Cornell University has new Equal Employment and Opportunity (EEO) language.

Please have your college president and an admission/transfer official sign the enclosed agreements. One copy is for your files. The second copy should be mailed to:

CALS Admissions

Feel free to contact me if you have any questions or concerns.

Kind regards,

A handwritten signature in cursive script that reads "Jeri Nyrop".

Transfer Admission and Articulation Agreement

between

Herkimer Community College

and

Cornell University's College of Agriculture and Life Sciences (CALs)

The College of Agriculture and Life Sciences (CALs) is dedicated to creating partnerships with community colleges that offer programs that align with CALs' mission. One important way of doing this is through articulation agreements. An articulation agreement matches coursework between schools and is designed to help students make a smooth transition when transferring to CALs.

This agreement is designed for students enrolled at *Herkimer Community College* who are pursuing a degree and are interested in transferring to the following academic programs within CALs:

- | | |
|---|---|
| • Agricultural Sciences | • Environmental Science and Sustainability (Science of Natural and Environmental Systems) |
| • Animal Science | • Food Science |
| • Applied Economics and Management*
(Fall applicants only) | • Information Science |
| • Atmospheric Science | • International Agriculture and Rural Development |
| • Biological Engineering | • Landscape Architecture
(Fall applicants only) |
| • Biological Science* | • Nutritional Sciences |
| • Biology and Society* | • Plant Sciences |
| • Biometry and Statistics | • Science of Earth Systems |
| • Communication | • Viticulture and Enology |
| • Development Sociology | |
| • Entomology | |
| • Environmental Engineering | |

All applications will be considered on a case-by-case basis. Applicants who do not meet the transfer prerequisites, or who have course withdrawals, incompletes, or part-time study, are less likely to be accepted.

***Spaces for Applied Economics and Management, Biological Sciences, and Biology and Society are particularly competitive.**

Students will be considered for transfer to Cornell University's College of Agriculture and Life Sciences and the opportunity to complete a Bachelor of Science Degree provided the following prerequisites are met.

1. All transfer course requirements (<http://cals.cornell.edu/admissions/apply/transfer/requirements/>) are fulfilled or in progress when applying for the student's intended CALS major with a "B" or better.
2. A minimum 3.0 cumulative grade point average is earned and the student is making satisfactory progress in their final semester courses prior to transfer.
3. The student has full-time student status.
4. The student has completed all application materials outlined in the checklist found at <http://admissions.cornell.edu/apply/transfer-applicants/transfer-application-checklist>.
5. The student is in good academic and disciplinary standing at current institution.

A maximum of 60 credits can be transferred, and credit is awarded upon review by the CALS Registrar once transfer admission is granted.

CALS does not award credit for college courses taught in high school, that apply toward high school graduation requirements, or that apply toward first-year admissions requirements for CALS. CALS awards AP credit based on exam scores. For a list of exams and scores accepted by CALS and policies regarding courses not completed at Cornell, see <http://cals.cornell.edu/academics/registrar/policies/>.

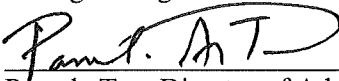

NOTE: Final decisions regarding acceptance to CALS rest solely with the Selection Committee.

If admitted, it is highly unlikely that a change of major will be granted.

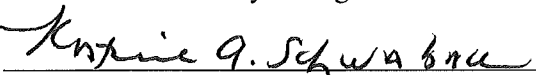

This agreement becomes effective on July 1, 2014 and can be modified or discontinued by mutual consent as deemed necessary by either institution.

AUTHORIZATIONS

 Date 6/17/14
Kathryn J. Boof, Dean
